<b>Office Action Summary</b>	<b>Application No.</b> 10/577,246	<b>Applicant(s)</b> BRUNEAU, MARCELLIN	
	<b>Examiner</b> Frederick L. Lagman	<b>Art Unit</b> 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 9, 12, and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by McAlpine et al #6,273,655. As broadly recited, McAlpine et al discloses the anchoring device comprising an elongate support member 18; a bearing member 48; an anchoring head 10, wherein the anchoring head comprises a flexible expansion member 16 and an actuation member 20, 24.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over McAlpine et al in view of Canadian Patent #2,342,707 to Boozer et al. McAlpine et al discloses the claimed invention except for the toothed outer surface and insertion wedge. Boozer et al discloses toothed outer surface and insertion wedge, see page 4, lines 1-4 and page 5, lines 1-3. It would have obvious to one of ordinary skill in the art

Art Unit: 3672

to provide the toothed outer surface and insertion wedge, since doing so facilitates anchoring the device in a borehole.

5. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over McAlpine et al in view of Adam et al #4,631,889. McAlpine et al discloses the claimed invention except for elongate band. Adam et al discloses an elongate band, see col. 1, lines 54-61. It would have been obvious to one of ordinary skill in the art to provide an elongate band, as suggested by Adam et al since doing so facilitates anchoring of a device in a borehole.

6. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over McAlpine et al in view of Canadian Patent #2,180,878 to Swemmer. McAlpine et al discloses the claimed invention except for adjustable diameter tube. Swemmer discloses an adjustable diameter tube (page 2, line 13 to page 3, line 2). It would have been obvious to one of ordinary skill in the art to provide an adjustable diameter tube as taught by Swemmer, so as to facilitate anchoring of the tube within a bore hole.

#### ***Allowable Subject Matter***

7. Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
